Marinas & Multiple Lifts

If you are considering multiple boat lifts for your marina, development, or community dock, you should carefully consider what kind of lift will offer the best results in the following categories.

- ◆ Aesthetics
- ◆ Safety
- ◆ Durability
- ◆ Ease of Operation
- ◆ Client Consideration
- ◆ Maintenance Issues
- ◆ Storm Preparation

Marina Jack's
Sarasota

15K No Profile Hybrid
Sarasota

Catwalk Elevator
Jet skis, paddle boards, kayaks

PWC LIFTS

Aesthetics

Boat lifts have usually been ruled out in marinas and multiple slips because they typically are so ugly and obtrusive. The No Profile Boat Lifts have changed that forever.

Aesthetics

The beauty of our design is obvious but the details that you can't see are the most impressive.

Don't be fooled by those who say they can build something "similar" or "just as good"..... they can't.

Aesthetics

When these were the only lifts available, it was acceptable. Today you have a choice. Don't settle for less.

When someone tells you they can build a lift just like the No Profile Boat Lift ask them these questions before making a decision.

Will I have to step over, under, or around any mechanical components to get into my boat?

The No Profile Boat Lift is the only boat lift that hides and safely stores the lifting components underfoot.

NO PROFILE™
BOAT LIFTS

SEAMLESS SIDE BY SIDE

No need for finger piers between lifts means more space for additional lifts!

Am I buying the safest lift to access and maintain my vessel?
Will the money I save on the purchase of a typical lift come back to bite me
when it comes to maintaining the value of my boat?

NO PROFILETM
BOAT LIFTS

The No Profile Boat Lifts allow you safe access and the perfect environment to properly clean and maintain your boat.

Would Police, Fire Rescue, Military, Marine Patrol, and Sea Tow be willing to rent a slip if it allowed them to maintain there boats?

Does your lift wind cable on a shaft?
What happens when the cables go slack?
What is the warranty on their cables?

Some manufacturers will tell you they build a similar lift but you can be sure they still wind cable on a shaft. They just hide this problem for you to find later!

The No Profile Boat Lifts don't wind cable on a shaft and they never come in contact with each other.

Slack cables have no effect on the No Profile Boat Lift due to our award winning design.

Will your lift remain level with 100% repeatability?

Does your lift depend on limit switches? If so why?

Straight & Level
Always

NO PROFILETM
BOAT LIFTS

Are the motors exposed to the harsh salt water conditions twenty-four hours a day?

Are the motors so attractive you'll want to put them on display?

**NO PROFILE™**
BOAT LIFTS

The No Profile Motors are stored in their own motor box and protected like a baby in the womb. They can even be remote mounted.

Safety Issues

When it comes to safely boarding your boat, can you offer the features of the No Profile Boat Lifts?

NO PROFILE[™]
BOAT LIFTS

Do the lifts your considering have standard features like these?

Quick-disconnect motors and control box for easy servicing?

Motors and control boxes can be swapped to other lifts in an emergency.

When a client has the opportunity to to store their boat safely out of the water, will they pay a premium to do it?

The No Profile Boat Lift allows the client to take care of their boat and save money long term by eliminating the wear and tear their boats receive being stored in the water full time.

The No Profile Invisible Lift
